The screenshot shows the OCLC website's AskQC section. At the top, there is a search bar with the text "How can we help you?". Below the search bar is a navigation menu with links for Home, WorldCat, Metadata Quality, and AskQC. The main content area features a heading "Previous AskQC office hours" with a sub-heading "Last updated: Mar 2, 2020". Below this is a link to "Find past AskQC office hour recordings and supporting materials." The main content is a list of office hours recordings, with the first one highlighted: "January 2020 :: Best practices for editing WorldCat bibliographic records". This entry includes links for "WebEx recording - January 7", "Presentation slides", and "Summary and member questions". Below this are two more entries: "November 13, 2019 :: Comparisons of searching in Connexion and Record Manager" and "October 2019 :: 1, 2, 3, 4, 5: Everything you wanted to know about stats but were afraid to ask". On the right side, there is a "Table of contents" sidebar listing all 11 office hours recordings.

WorldCat Matching release notes

WorldCat Matching Release Notes

Release Date: January 16, 2020

Introduction

This release of changes to WorldCat Matching involves the following improvements to Duplicate Detection and Resolution (DDR):

Improved DDR Comparison of Medium of Performance Differences for Musical Scores.

Improved DDR Matching of Extent in Field 300.

Improved DDR Matching of Online Serials.

Improved DDR Matching of Roman and Arabic Numerals in Titles.

These improvements have been prompted primarily by feedback from members of the OCLC cooperative and accomplished by the discussion, investigation, and testing work of the matching team at OCLC.

WorldCat Matching Release Notes

Improved DDR matching of online serials

DDR matching now identifies and merges more duplicate records for online manifestations of continuing resources. Previously, such records with identical OCLC symbols in field 040 subfield \$c were purposely not being merged under the supposition that the institution intended separate records for legitimate reasons. In the time since the 2009 implementation of this rule, multiple improvements especially to title and “author” matching have proven themselves to be more effective in making accurate matches to such an extent that the old rule has become counterproductive. Removal of this outdated rule means fewer duplicates for electronic serials.

How does a record get to DDR?
