The message "Printer not found in network" is showing in my Connexion client printing options

Symptom

• Labels will not print from Connexion client and I see a "Printer not found in network" message next to my printer options

Applies to

• Connexion client all versions

Resolution

If labels are not printing from Connexion client and you see the "Printer not found in network" message next to your printer, follow the below steps to correct the issue:

1. Sign in to Connexion client.
2. Select Tools > Options > Printing.
3. Select a different printer under the Label Printer options.
4. Close the session and sign in again.
5. Select Tools > Options > Printing.
6. Select the printer you want to use. The message "Printer not found in network" should no longer be showing.
