When I am setting up the ILLiad Services, what Startup Type should we use?

Last updated: Thu, 30 Jul 2020 20:52:46 GMT

Symptom

• You want to know what startup type you should use for the ILLiad Services

Applies to

• ILLiad

Resolution

Here are the different steps you need to follow to make sure your ILLiad Services start properly:

1. All the ILLiad services should be using Automatic (Delayed Start).
2. Whichever server your SQL Server is on, the Microsoft SQL Agent should be set for the Startup Type of Automatic.
