Is there any vulnerability to ILLiad with the Log4J or the CVE-2021-44228 vulnerability?

Last updated: Thu, 16 Dec 2021 19:40:25 GMT

Applies to

- ILLiad

Answer

ATLAS has come up with a solution on their [ILLiad 9.1.1 ISO Service Update to address the log4j security vulnerability page](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/Is_there_any_vulnerability_with_ILLiad_to_the_Log...). If you are upgrading ISO ILL, you can verify the version in the ILLiad Customization Manager for the VersionISO will be 9.1.1.0 or higher as the correct version.

You should also make sure in the ILLiad Customization Manager that the Billing Information fields are filled in on the Local Info table:

![Local Info table with Billing Information fields](image)

Edit these fields.
